

# Mobile crusher

## Mobile crusher brief introduction:

SBM mobile crusher (sales code: Y) is fully adaptable to all mobile crushing needs. The mobile crusher can eliminate obstacles caused by location, environment, foundation configuration, consequently provide simple, efficient, low-cost crushing equipment. SBM mobile crusher offers high efficient and low cost project plants for the client without environment limit.

## Mobile crusher is suitable for:

### Mobile crusher features and benefits:

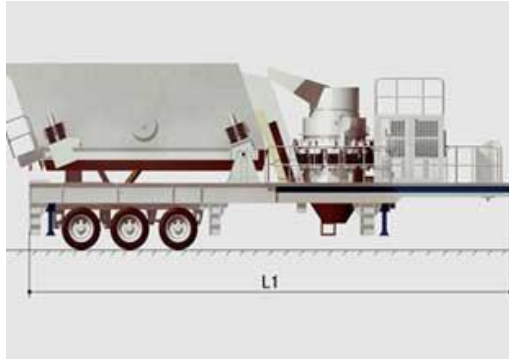

- 1) SBM mobile crusher can be armed with high quality jaw crusher, cone crusher and impact crusher according to the customers' needs.
- 2) SBM mobile crusher mounted feeder, screen, belt-conveyor on board.
- 3) SBM mobile crusher is convenient for road transportation for traction steering shaft.
- 4) SBM mobile crusher is equipped with motor and control box.
- 5) SBM mobile crusher is equipped with semi-trailer landing gears, which bring about quick and easy installation.
- 6) Integrated with landing gears, quick and convenient installation on site.

### Mobile crusher technical advantages:

- 1) **Good mobility**  
SBM mobile crushing plant has high chassis and small turning radius, which is suitable for road transportation, especially for driving to crushing sites that are difficult to access. The preparation time of the mobile crushing plant are greatly reduced, compared with the fixed one.
- 2) **Greatly reduce material transportation cost**  
SBM Y series mobile crushing plants crush the material on crushing site, without transporting the materials for off-site crushing.
- 3) **Combination is flexible for construction**  
According to different customers' requirements, SBM Y series mobile crushing plant can be operated as independent units, or as two-stage crushing plant with primary and secondary crushing, or as three-stage crushing plant with primary, secondary, and tertiary crushing. Likewise, Y series mobile crushing plant can be easily adjusted to suit the crushing application by choosing feeding to crusher or feeding to screen options.
- 4) **Reliable performance and convenient maintenance**  
Y series mobile crushing plants adapt excellent quality crusher, screen and feeder. Normal belt conveyor can be used for conveyance of material, which is of mature technology, simply operation, easy maintenance, and low investment.
- 5) **Customized production and flexible configuration**  
We can provide special mobile crushing plant based on customers' crushing site, material,

and particle shape requirements, etc. Such as self-load belt conveyor, multiple machines combined type, single machine type and so on.
